

Using Cursor Terminal (Recommended)

1. Open the project folder in Cursor.
2. Open the terminal inside Cursor:
 1. ``Ctrl + ``` (backtick) on Linux/Windows
 2. or use **Terminal → New Terminal**
3. Run:

```
git init
```

This creates a hidden `.git` folder and starts Git tracking.

Verify Git Tracking

Run:

```
git status
```

If successful, you'll see something like:

On branch master

No commits yet

or

On branch main

Add Files to Tracking

```
git add .
```

Create First Commit

```
git commit -m "Initial commit"
```

Optional — Connect to GitHub

Create a repository on [GitHub](https://github.com) and then run:

```
git remote add origin https://github.com/USERNAME/REPO.git
git branch -M main
git push -u origin main
```

Replace:

USERNAME → your GitHub username
REPO → repository name
